

Accreditation and Certification

An approach to improve your value proposition and gain a larger share of the market

HMA's dedicated team of professionals has decades of experience leading organizations across the country to successful accreditation. Our colleagues work side-by-side with health plans and other organizations to prepare for successful surveys.

By obtaining accreditation or certifications, non-health plan organizations can:

- » Differentiate your organization from competitors— health plans and other organizations that are accredited prefer subcontractor delegates who are also accredited.
- » Distinguish your organization's service and quality by aligning operations with survey standards and requirements of potential clients.
- » Reduce administrative burden by maintaining your organization's accreditation and avoid unexpected requirements and document requests.

AVAILABLE PRODUCTS INCLUDE:

Utilization Management Accreditation provides a framework for organizations performing clinical reviews of medications, healthcare services and treatments.

Care Management Accreditation provides a model for organizations to meet requirements when transitioning patients across settings and with chronic conditions.

Case Management for Long-term Services and Supports (LTSS) Accreditation assists organizations coordinating LTSS to meet fundamental program expectations and practices

Credentialing Accreditation focuses on consumer protection as an essential safety component of healthcare system providers.

Provider Network Accreditation helps organizations provide efficient, accurate and consistent network management and credentialing services for other organizations.

Population Health Program Accreditation evaluates an organization's data integration, population assessment and segmentation processes.

Health Information Line Certification focuses on organizations that operate a health information line to help individuals with wellness and prevention and pharmacy benefits.

Health and Wellness Promotion Accreditation/Certification focuses on services most desired by employers and health plans to help consumers assess their health status and choose healthy behaviors.

Health Equity Accreditation focuses on the foundation of health equity work with the goal of reducing health inequities and improving care.

Health Equity Accreditation Plus focuses on community social risk factors and patients' social needs to help organizations offer social resources that can have the most impact.

HMA can help your organization obtain the right accreditation or certification to fit your goals by identifying:

- » Additional requirements including documented processes, reports and other tools
- » Organizational functions addressed in accreditation standards and guidelines
- » Ways to help clients ensure the entire organization is survey-ready and to maintain delegation status with clients
