

INTEGRATED DELIVERY SYSTEM READINESS ASSESSMENT

MOVING HOSPITAL-BASED PROVIDERS FROM THEORY TO ACTION

HMA offers a customized **Integrated Delivery System Readiness Assessment Tool** that includes individual and group self-assessment questionnaires. Combined with HMA consultants' analysis of your operational and strategic opportunities, we can help you identify transformation options that your key constituencies and stakeholders can support.

ASSESSMENT DOMAINS INCLUDE:

Governance Structures Responsive to IDS Requirements	Hospital/Physician Alignment	Clinical Integration/Care Management Infrastructure
Ambulatory Care Capability for Continuum of Care Delivery	Financial Integration – Value and Accountability	Information Technology – Continuity and Capabilities
Quality, Performance Improvement, Patient Safety	Talent Management and Human Resources	<i>All of the above lead to successful... Population Management</i>

“The Integrated Delivery System (IDS) is an organization that, through ownership or formal agreements, vertically and horizontally aligns health care facilities, programs or services in order to offer a coordinated continuum of health care to a defined geographic population, and that is willing to be held responsible clinically and fiscally for the health status of that population.”

– WAN, LIN, & MA.

Journal of Medical Systems 26, No. 2, April 2002.

Is your organization ready?
